

ENVIRONMENTALLY SENSITIVE PET PRODUCTS

It's All In The Numbers...

Ideal Pet™ Products is committed to energy conservation and the environment, by continuing to design products that are sensitive to the energy needs of today. In that spirit, our Wind Resistance Performance Graph (below), will assist you in determining what type of door style best suits your requirements.

NOTE: while all pet doors will perform equally as well with the LockOut Slide in place, the true test of the door is when the LockOut Slide is removed.

Reduce, Reuse, Recycle...

Ideal Pet™ Pet Doors- Percentages Of Post-Consumer (Recycled) Material

Item Name	Plastic (Frames)	Metal (Frames)	Paper (Cartons)
